

# SECOND PLANTER™

## BEAUTY IN THE BLINK OF AN EYE

Newly reimagined for Spring 2025, the 30-Second Planter is designed to be the easiest entry point into container gardening for budding gardeners and those pressed for time. In literally 30 seconds or less, their containers and landscapes can be overflowing with gorgeous blooms that have proven to be compatible in recipes. Simple planting instructions and a QR code are printed on the container for additional reference.

30-Second Planters are being offered by Four Star Greenhouse and Pleasant View Gardens as a pilot program with independent garden centers for spring 2024. A full rollout and tag options may become available for 2025.
